**The Garnaud Review
C/o The Wilderness Society
GPO Box 718 Hobart
Tasmania 7001**

As addressed-

We write in consternation at the continuing potentially devastating situation in Tasmania's forests. There are so many issues involved it would take a very long letter to address so a short list is included here. These forests include some of the greatest living things on this earth. Gunns Limited Half Yearly Report highlights the substantial risk the pulp mill poses for potential funders such as their bank, the ANZ. The mill is opposed by the majority of Tasmanians and presents a huge threat to their economy, communities and environment. The location of the proposed mill has the potential for serious and probably irreparable damage to the environment both on land and sea.

We believe it should be stopped.

Yours faithfully

D. A. Campbell
